Overview

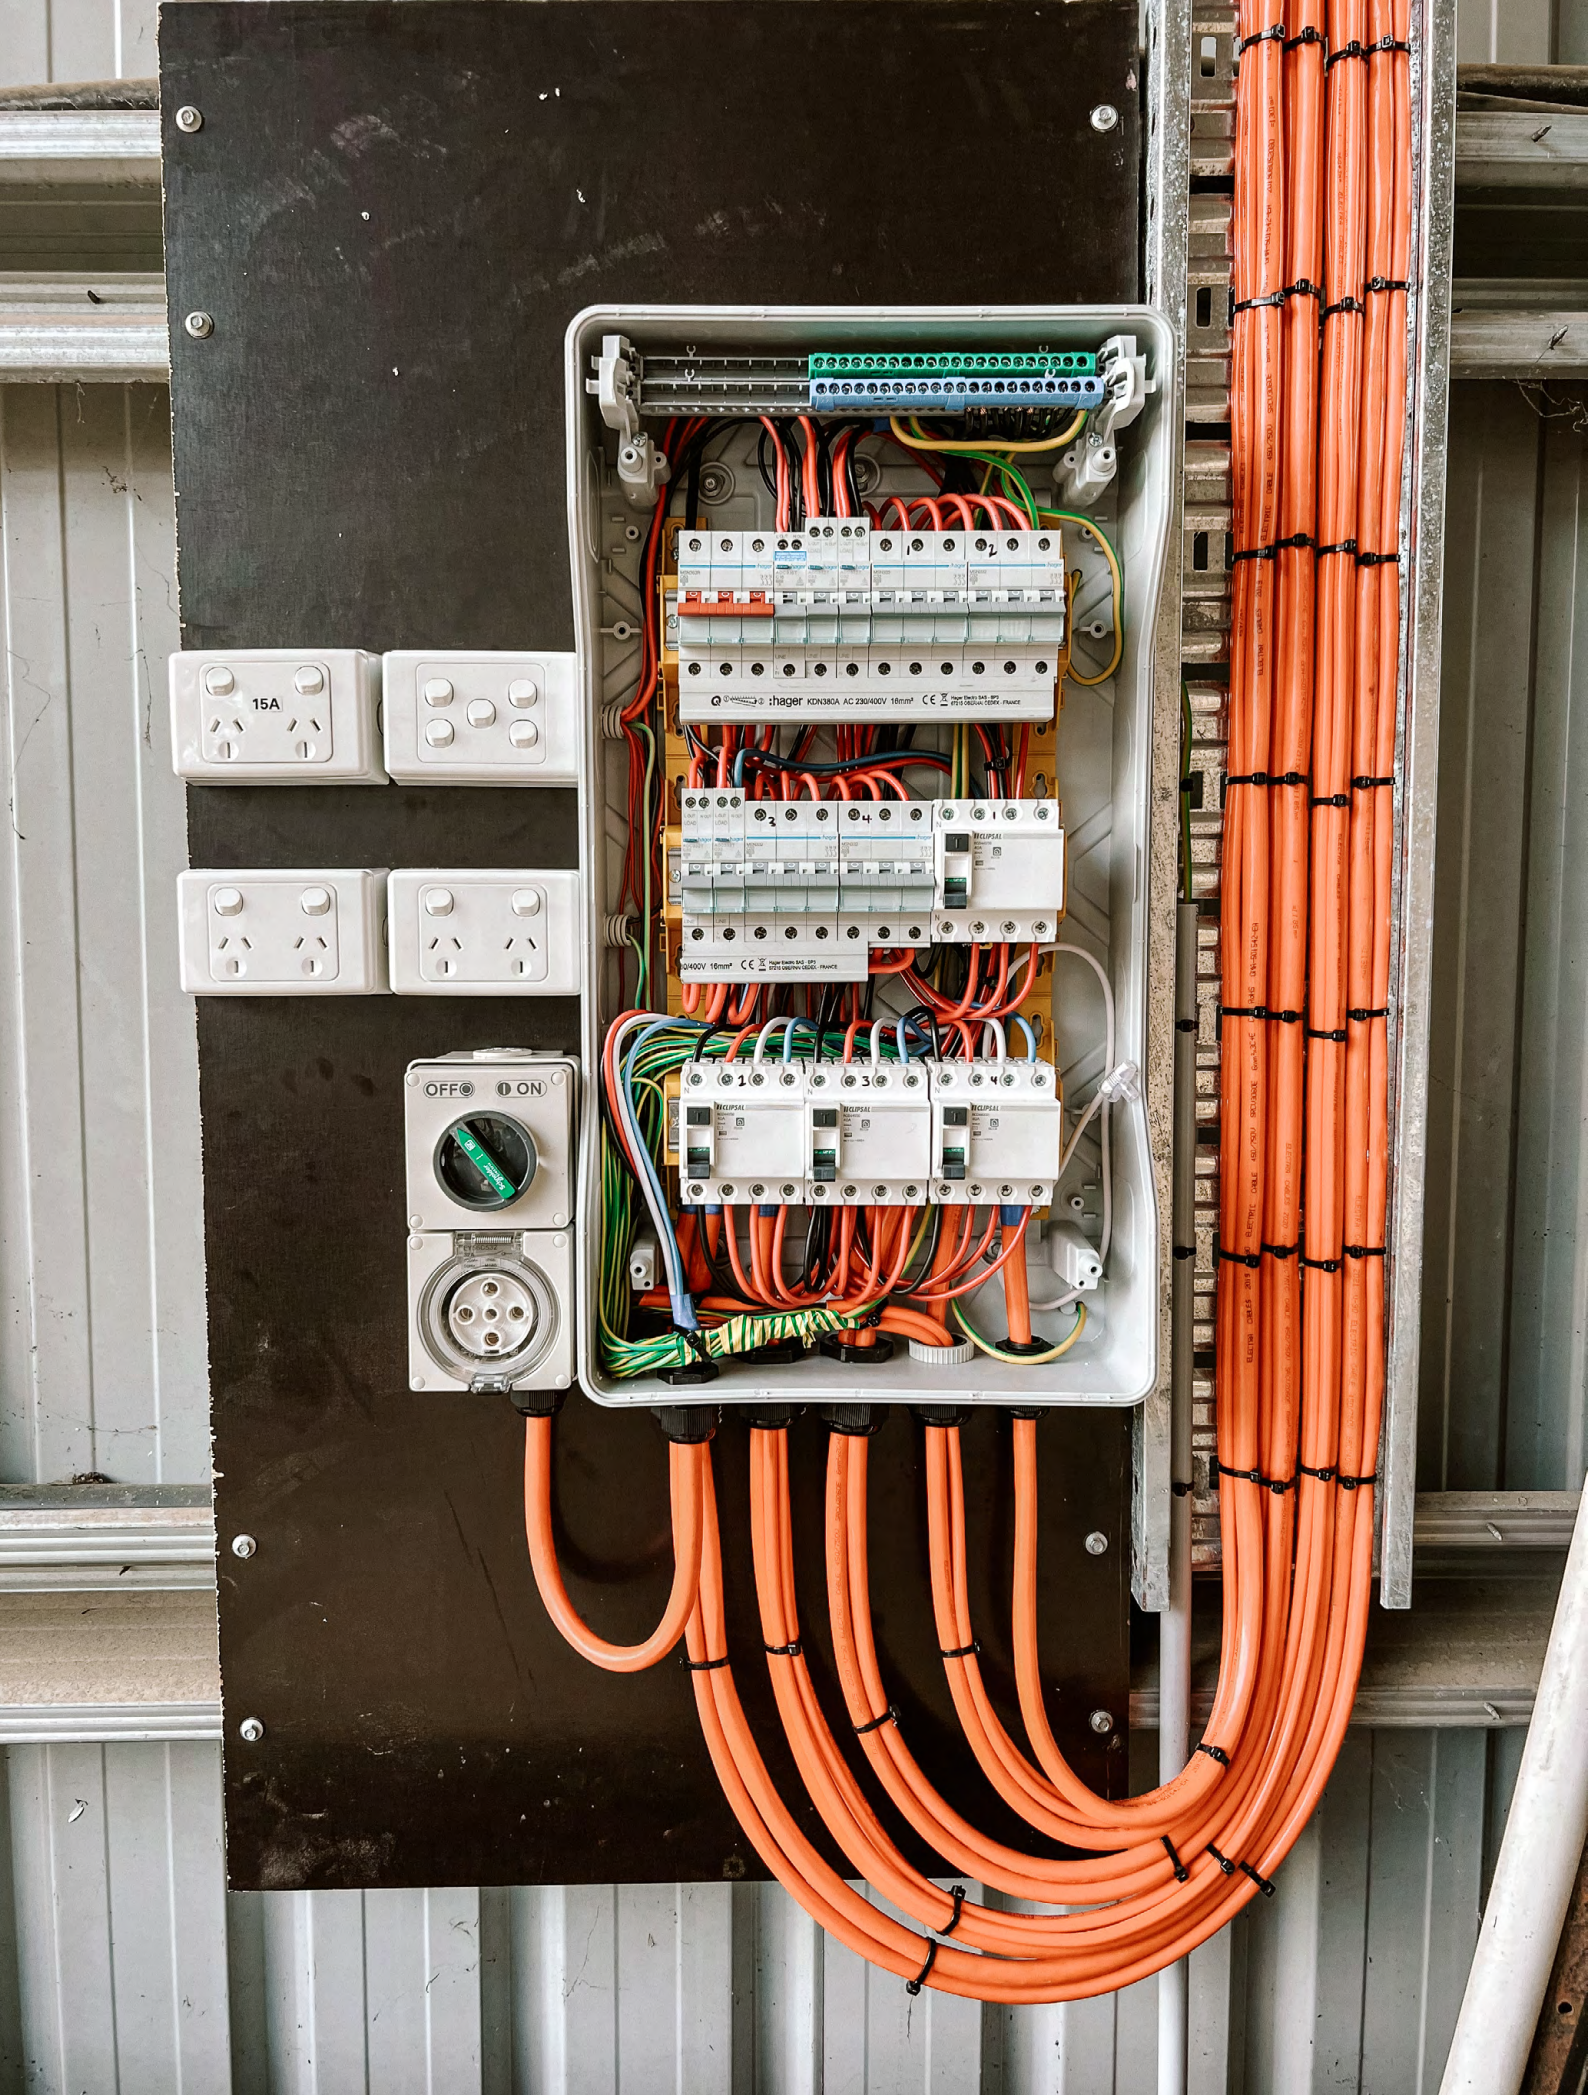

At Lined Electrical, we combine over 20 years of operational excellence with a deep-rooted family business ethos to deliver top-tier electrical services across Queensland and New South Wales. As trusted commercial and industrial electrical contractors, we pride ourselves on providing reliable and efficient solutions that meet the rigorous demands of large-scale projects.

Our team is comprised of highly skilled professionals who are not only rigorously trained and fully licensed but also share a commitment to honesty, safety, and superior workmanship. This dedication ensures that all our projects adhere to Australian Standards for electrical and mechanical maintenance, making us a steadfast partner in commercial and industrial settings.

We offer a comprehensive suite of services tailored to the unique needs of each client, including commercial and industrial electrical installations, switchboard upgrades, solar installations, and more. Each service is designed to enhance energy efficiency, functionality, and aesthetics of the work environments we service, ensuring optimal operation and cost-effectiveness.

With Lined Electrical, you're choosing a partner who values safety as the utmost priority, provides quotes with electrical audits, and maintains a clean, neat, and security-conscious workforce. We are proud locals of the Sunshine Coast, passionately committed to contributing positively to our community and your projects.

Mission, Vision, & Values

Mission

Our mission is to set industry benchmarks in electrical service delivery by integrating precision, efficiency, and innovation into every project. We are dedicated to:

- Delivering competitively priced and high-quality services executed with utmost professionalism.
- Ensuring our work not only meets but exceeds client expectations.
- Completing projects within the stipulated budget and timeline, demonstrating our reliability and commitment to efficiency in every task.

Vision

To enhance the operational capabilities of our clients through cutting-edge electrical solutions that improve efficiency and sustainability. We aim to be the leading provider of electrical services in Queensland and New South Wales, renowned for our innovative approach to solving complex challenges in the commercial and industrial sectors.

Our Values

Reliability

Punctuality and dependability in every project

Quality

Exceptional craftsmanship and meticulous attention to detail

Strength

Durable and long-lasting solutions

Innovation

Cutting-edge technologies and methods

Leadership

Jonny Green's career in the electrical industry began in 2004, and over the past two decades, he has gained a wealth of experience across a broad spectrum of sectors, including domestic, commercial, industrial maintenance, and construction, as well as specialized areas like mining, solar, and oil & gas. His extensive work history features collaborations with industry leaders such as Chevron, BHP, Origin Energy, and more, where he has taken on critical roles in major projects across the southern hemisphere.

As a qualified tradesman and director, Jonny champions a safety-first approach, coupled with a self-motivated and positive attitude that ensures all tasks are completed punctually and to the highest industry standards. His leadership extends beyond project management, fostering a culture of exceptional customer service, continuous learning, and safety, which empowers the team at Lined Electrical to excel.

Core Competencies

Expertise Across Sectors

At Lined Electrical, we bring a breadth of knowledge and expertise that spans various industries. From enhancing commercial spaces with modern electrical fit-outs to powering large-scale industrial operations, our team is equipped to handle projects of any magnitude with precision and efficiency.

Advanced Technological Integration

We employ state-of-the-art technology in all our services, from detailed energy audits that drive efficiency improvements to the installation of sophisticated automated control systems that enhance industrial productivity. Our commitment to technological advancement ensures optimal outcomes for all electrical setups.

Customised Electrical Solutions

Recognising that each client has unique needs, we specialise in designing and implementing tailored solutions. Whether it's custom off-grid power systems, specialised heavy machinery installations, or comprehensive energy management systems, our solutions are meticulously crafted to meet specific operational requirements.

Sustainability and Energy Efficiency

Our dedication to sustainability is demonstrated through our extensive offerings in solar panel installations and energy efficiency audits. We are at the forefront of promoting and implementing green energy solutions, helping businesses reduce their environmental impact while optimising operational costs.

Regulatory Compliance and Safety Assurance

We ensure that all projects not only meet but exceed the stringent Australian Standards for safety and electrical compliance. Our rigorous safety checks and regular maintenance services are designed to uphold the highest standards of safety and reliability.

Reliable Support and Maintenance

Our commitment extends beyond project completion. We provide ongoing support and maintenance, ensuring that every electrical system continues to operate at peak efficiency and safety long after installation. This ongoing engagement is crucial for maintaining client trust and operational continuity.

Differentiators

Specialised Electrical Expertise

Lined Electrical stands out with its extensive expertise in both commercial and industrial electrical services. Our full-spectrum approach encompasses project management, custom solution design, installation, and maintenance, ensuring we meet every client's specific requirements.

Long-Term Professional Team

We take pride in the long tenure of our staff, which translates to deep industry knowledge and consistency in service delivery. Our experienced team is equipped to manage projects efficiently, reducing ramp-up time and enhancing overall project execution.

Solution-Oriented Approach

We focus on providing solutions that are best suited to the needs of our clients rather than being tied to specific brands. This flexibility allows us to recommend the most reliable and cost-effective options.

Comprehensive Project Scoping

We invest significant time in thoroughly scoping each project. This initial investment ensures greater efficiency and accuracy in project execution, aligning with our commitment to exceed client expectations.

Commitment to Excellence

We instill trust by consistently doing what we promise. Our dedication to getting the job done right the first time eliminates costly reworks and builds lasting client relationships.

Clear, Ongoing Communication

We understand that regular and detailed communication is essential for the success of any project. Our proactive communication strategies ensure that all stakeholders are well-informed and engaged throughout the project lifecycle.

Responsive and Adaptable Service

With capabilities to serve both metropolitan and regional areas across Queensland and New South Wales, we are prepared to provide personalised and responsive service to all our clients, regardless of location.

Accountability and Quality Assurance

We hold ourselves accountable for the quality of our work and are committed to delivering high standards consistently. Our focus on quality assurance and client satisfaction ensures successful project outcomes and enduring solutions.

Efficient Problem Resolution

Our team is client-focused and dedicated to swift and effective problem resolution. We address issues promptly and with minimal disruption, ensuring seamless project progress.

Industry Experience

Extensive Project Portfolio

Lined Electrical has a proven track record of delivering high-quality electrical services across a diverse range of industries. Our team's expertise spans commercial, industrial, and specialised projects, ensuring top-tier solutions for every client.

Industry Engagement

Our services extend to a broad range of sectors, reflecting our adaptability and deep understanding of different operational and regulatory environments.

HIGHLIGHTED PROJECTS

Lithgow Blast Furnace - Lithgow City Council

Location

Lithgow, NSW

Description

Innovative lighting solution for heritage listed building dating back to 1875.

Client Contact

Ray Christison

Dorrigo Quad Stall - NSW National Parks and Wildlife Service

Location

Dorrigo Mountain, NSW

Description

Electrical and communication for public facilities.

Client Contact

Jay Franklin

Industry Sectors

-  **Mining:** Specialising in both above-ground and underground operations, providing everything from initial electrical installations to ongoing maintenance.
-  **Manufacturing:** Offering comprehensive services from machinery installations to complete factory fit-outs.
-  **Community and Public Infrastructure:** Implementing state-of-the-art electrical systems for community centres, public lighting, and heritage projects.
-  **Commercial:** Tailoring solutions for retail and office spaces, from basic electrical upgrades to complex integrations of energy-efficient systems.

Laminex - Toolara Instrumentation Shutdown Maintenance

Location

Toolara Forest, QLD

Description

Scheduled electrical maintenance for a major manufacturing facility.

Client Contact

Glenn Long

Aeris Resources - Cracow Community & Heritage Centre

Location

Cracow, QLD Town Centre

Description

Installation of community centre's lighting and power systems.

Client Contact

Tristan Bosma

Services

At Lined Electrical, we offer a wide range of specialized electrical services designed to meet the diverse needs of our clients across various industries. Our services are segmented into three primary categories: Commercial Electrical Services, Industrial Electrical Services, and Innovative Off-Grid Power Solutions.

Commercial Electrical Services

Retail & Office Fit-outs

Specialised electrical services for new office or retail fit-outs, including lighting design, power layout, and installation of point of sale systems.

Solar Panel Installation & Maintenance

Promoting sustainable energy solutions by providing solar planning, installation and maintenance services.

Energy Efficiency Audits & Solutions

Comprehensive energy audits to help businesses reduce energy consumption and costs, followed by implementing energy-efficient solutions.

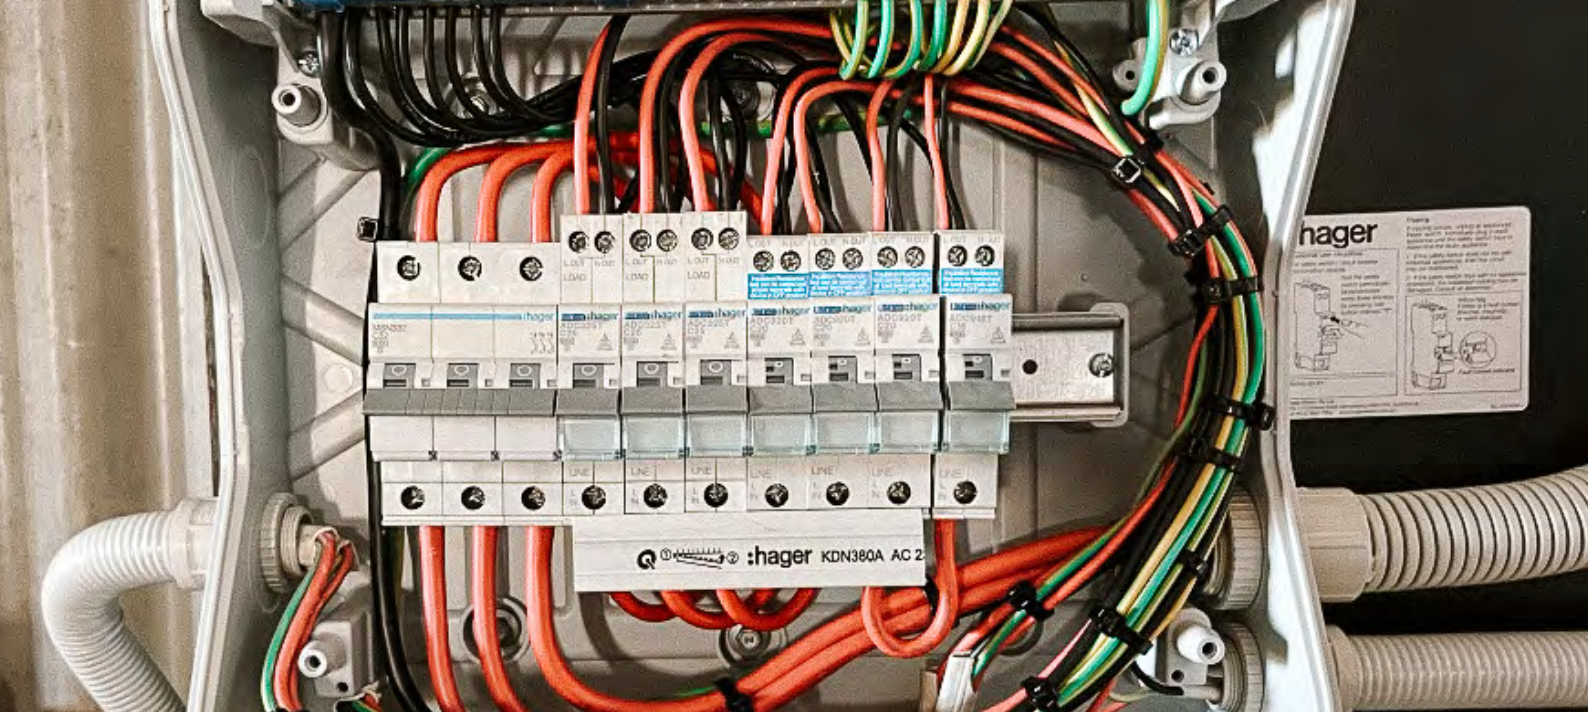

Electrical Maintenance & Safety Checks

Regular maintenance services including safety checks, testing and tagging of electrical equipment, and emergency lighting tests to ensure compliance.

Data & Communication Cabling

Installation and maintenance of structured cabling systems for data and communication.

Industrial Electrical Services

Heavy Machinery & Plant Installation

Installation, maintenance, and repair services for heavy electrical machinery, including conveyor systems, manufacturing plants, and production lines.

Plant Shutdown Maintenance & Inspections

Expert maintenance and inspections during plant shutdowns to ensure safety, reliability, and operational efficiency.

Emergency & Backup Power Solutions

Solutions for uninterrupted power supply, including installation of generators and backup systems to ensure continuity of operations.

Electrical Safety Compliance & Audits

Comprehensive electrical safety audits and ensuring compliance with industry-specific safety standards and regulations.

Innovative Off-Grid Power Solutions

Custom Off-Grid Power Systems

Designing and installing bespoke off-grid power systems tailored to the specific needs of the client, whether for commercial, industrial, or rural applications.

Battery Storage Solutions

Providing advanced battery storage systems to store excess energy generated by off-grid systems, ensuring a reliable power supply.

Energy Management & Monitoring

Implementing comprehensive systems for energy audits, management, and monitoring to optimise energy usage and reduce operational costs.

Remote Area Power Supply (RAPS)

Specialized services for remote locations where connecting to the grid is impractical or too costly, ensuring reliable power supply in isolated areas.

Maintenance & Support

Providing ongoing maintenance, support, and upgrades for off-grid systems to ensure their longevity and efficiency.

Clients

Lined Electrical is proud to serve a diverse and prestigious group of clients across Queensland and New South Wales. Our commitment to excellence, reliability, and innovative solutions has earned the trust of leading brands in various sectors.

Below are highlighted clients who have chosen Lined Electrical, reflecting the success and reliability of our projects:

Each client listed showcases our ability to handle complex challenges and deliver solutions that meet the high standards expected by leading brands and industries. Our approach is tailored to each client's specific needs, ensuring optimal outcomes and continued partnership.

Certifications & Insurances

Lined Electrical is committed to excellence and professionalism in all aspects of our operations. Our certifications and memberships with leading industry bodies underscore this commitment:

CERTIFICATIONS

- **Clean Energy Council (CEC):** Supports our dedication to sustainable energy practices and innovations.
- **National Electrical and Communications Association (NECA):** Keeps us at the forefront of industry advancements and best practices, ensuring we are well-equipped to handle the evolving needs of our clients.
- **Solar Accreditation Australia (SAA):** Recognises our expertise in solar energy installations and our commitment to promoting renewable energy solutions.
- **Australian Owned Certification:** Affirms our commitment to supporting local industries and contributing positively to the communities we serve.

These certifications are essential to our operational framework. They ensure that we maintain the highest standards of safety, quality, and efficiency in every project we undertake. By holding these certifications, we demonstrate our commitment to professional excellence and compliance with the latest industry regulations and standards.

INSURANCES

Lined Electrical maintains comprehensive insurance coverage to protect our clients, projects, and workforce. Our policies include:

- **Public Liability Insurance:** Coverage of up to \$20 million
- **Professional Indemnity Insurance:** Coverage of up to \$10 million
- **WorkCover Insurance:** Coverage for the whole team
- **QLD WorkSafe:** QLD licence number #88179
- **Service NSW:** NSW Fair Trading Contractor Licence #455328C

These insurances are integral to our risk management strategy, providing an additional layer of security for our projects and further demonstrating our commitment to conducting business with the highest degree of integrity and responsibility.
